

Sripad Bharati - Moderator
Managing Director

FreightOscope

- Over 20 years of experience with a combination of Logistics and technology and leading the digital transformation in the logistics industry.
- Sripad wears multiple hats with finesse. As a CIO (Chief Information Officer) of WCAworld - the largest network of independent freight forwarders globally, Sripad is responsible for the technology initiative within WCAworld. Simultaneously, as a Managing Director for FreightOscope - An Innovative software product company which produces cutting-edge digital tools tailored for the evolving needs of freight forwarders worldwide, he is driving unparalleled growth and efficiency in logistics through the seamless integration of technology and business.

Daniel Adams PMP

COO

Logistics Technology

- More than 20 years of expertise in developing and implementing technology.
- His journey in logistics started working with e-Courier software. After seeing the challenges to meet ever changing customer demands he joined Logistics Technology HQ as the COO and co-owner.
- Prior to working in logistics Daniel worked in the mining industry developing and implementing leading edge systems such as autonomous equipment and efficiently actioning complex data.
- When not working you'll find Daniel farming and enjoying all things outdoors in Colorado.

Steve Bonnici

Founder & CEO

Urgent Couriers and DFRNT

- 35+ years of transport expertise founding and running Urgent Couriers
- Created DFRNT, a TMS platform & driver app addressing real-world logistics challenges
- DFRNT automates common transport inefficiencies to improve profitability
- The DFRNT platform enables Urgent Couriers to be the most accurate delivery agent for the world's biggest food box company

Stuart Fern

Director of Solutions

Dispatch Science

- Dispatch Science, a leading tech company that is revolutionizing the transportation management software industry for last-mile couriers and delivery businesses.
- Stuart spent his early career in last mile and reverse logistics, seeing the power of data, then moved into healthcare and big data analytics, focusing on supporting companies during the IPO stage.
- Today, Stuart is passionate about using AI powered solutions in the last mile to transform the customer experience, and particularly excited to see how historical data can be used to predict future events and derive insights.
- When he's not working with clients, he enjoys spending time with his new daughter, training for triathlons and cooking for his friends and family.

Craig Strickland

CSO

BoxC Logistics, Inc

- Expertise in sales initiatives and client engagements.
- Prior to this position, Craig was President of Global Business Development at BoxC, leading customer onboarding efforts and coordinating new revenues.
- Previous to BoxC, Craig held multiple executive roles at UPS over 30+ years, including Global Solutions, Global Sales, International Implementations and Small Package Operations.
